SOCIAL DILEMMA

How social media marketing
works

DEAR READERS

Welcome to our school magazine!

Our magazine stands for diversity. Here you will find everything from political articles to sports articles. Our team of 10 students worked hard on it the last weeks. Every single member gave his best. We hope that you will like it and maybe you would recommend it to a friend.

Every article is written thoughtfully and with love. We hope to inspire you.

Your team of the School elements

Zoe B. Lena B.

A full-page background image of Stephen Curry in a white Golden State Warriors jersey with the number 30. He is in mid-air, holding a basketball with his right hand, looking upwards. The background is a dark arena with bright spotlights.

Mittersill in times of WWII

Austria 1938: After our chancellor Dollfuß was shot, our government resigned. On March 12th German troops went over the border between Austria and the German empire. Austria was now part of Germany. Because of the Regime-Change many politicians and other people working for public organizations had to step back. Organizations like the Catholic School club, or the Musikbund Oberpinzgau and more had to stop. The names of the new associations were not allowed to have the words "Österreich" or "Gewerkschaft" in their names. There was also a new rule: Individuals can only become members if they are Aryans of German or related blood!

Persecution of the Jews: The story of Mrs. Bierer and her husband: "We moved to Mittersill in 1937, where my husband worked as a dentist. After Hitler came to power, my husband was arrested, tied with a rope and driven into an avenue to hang him. The gendarmerie took him under their protection out of consideration for me. From then on we were tormented unspeakably. Loyal Nazi supporters looted our practice, little by little our apartment, and smeared our house with "traitors" on a daily basis. My husband was arrested again, transferred to Salzburg and further tortured. At my request and promise to leave the country immediately, he was set free. In 1939 we flew to France."

(DÖW, Widerstand in Salzburg, 1991)

Hitlerjugend: Many children joined it voluntary. Everyone was proud and had a great time. There was a feeling of community and togetherness. They met once a week after school and their first HJ leader was Eibel Kurt after he was sent to the front, Pichler Walter was the next one. Everything was organised like in a military there was one Jungzugführer for 30 boys. 1943 everyone had to be a member, but there was no pressure if you didn't come.

War start 1939: It all started on the 1st of September in Poland. Poland was defeated after only 18 days. War was surrendered to the winners on September 27th with an occupation of 100,000 men. Poland is completely occupied by German troops and the areas of Belarus and Ukraine have been taken over by Soviet Russia.

Invasion of the Americans: May 8th: The Americans invade Mittersill. The war is over! Only in history will Preußen and Hitler have the qualifications of a bully and a robber state. Hail Austria, our fatherland!

(personal diary of Norbert Vogelreiter)

ASK

Hi, I have a problem with my friends. They often make fun of me. I know they mean it funny, but it is still hurtful. I am a little scared to talk with them about this, because they will maybe get it wrong and think I don't like them anymore. Maybe you can help me and tell me how I should tell them, that this is not funny for me and that they should stop without hurting them?

Alina, 13

Hi, in our class there is a girl. She is a bit shy and does not speak very often. Most of the time she sits alone, because she doesn't have many friends at our school. Lately she looked very sad. I just know that her family has problems, and her parents are likely to get divorced. I want to help her, but I do not know how. I'd be happy if you can help me.

Jonas, 15

Hi Alina!

I feel really sorry for you. You can take a serious talk with them and tell them how you feel about this. If you talk to them in a friendly way, I am sure they will not get you wrong.

If you do not want to talk with them personally about this, you can write them a letter, where you explain the problem and ask them to stop making fun of you. Just do not write it in a rude way and they will not misunderstand you. But you must be clear, that they will speak to you about this, even if you write them a letter.

Hope I can help you and you can solve the problem.

Hi Jonas!

I think it's very caring of you, that you worry for your classmates.

Since you know she has problems and she doesn't have many friends at your school, you should talk to her and ask her if she wants to speak about her problems. Or you should talk with your classmates and you can comfort and help her together. If you want and it is okay for her, you also can ask your teacher for advice and help.

Hopefully, she will be better soon.

ASK

Hi, in our school there is a very strict teacher. We have him in Maths, and he doesn't like our class. I am very bad at this subject and I do not understand some stuff. We also get much homework, and I don't understand this neither. Sometimes I work till night, but still don't get it right. Can you give me some advice on how to organize my homework better or can you tell me how I should ask my teacher give less homework or whether he explains it to us again without getting him angry? I am really overworked.

Leah, 15

Hi Leah!

In your age many teenager have problems with school and learning. Maybe you should ask your teacher to explain it again, if you don't understand the stuff. Or you can ask him if he could promote you or you can take private tutoring. Talk to your classmates and ask them how they feel about it and if they are overworked too. It's better if you talk to the teacher all together. I am sure your teacher will understand you, and if not you can talk with your class teacher or another teacher of your trust.

Electric magnetism

Electricity and magnetism are important physics applications that are in many electronic and electrical equipment. Magnetism is a physical phenomenon that can be expected to be magnetized. Magnets can generate magnetic fields that are invisible for our eyes. You could get some tools that you're able to see the magnetic lines of the field.

Everybody knows magnets as a cube of iron that could pull or push objects that are magnetic too. But have you known that every cable you have in your house is also generating a magnetic field.

Experiment

Take a long piece of iron, a 1 - 2cm copper wire (Kupferdraht) and a battery. Wrap the wire around the iron that you could hold the two ends to the battery. One to the minus and one to the plus pole. The electricity generates a magnetic field. The tiny magnetic particles in the iron piece will organize them to the North- and South pole. You could test it when you hold the magnet to another iron piece. It also keeps the magnetic effect until you hit it against a table or something.

Our social dilemma

Do you know it? You like a post on Instagram, where someone is at McDonalds. Later you go to Facebook, you see a post from McDonalds, but you don't give it a like. The next day when you open Instagram, there's suddenly an ad from McDonalds. But how does that work?

Do Facebook, Twitter or Instagram cost money to use? No, there're free. You can just download it on any App Store you want without paying any money. But wait, how does that work? Google has thousands of employees, which want money every month, but we don't pay anything. The answer is personalized ads. What is this? The answer is very simple. Ads are almost everywhere if the program/application is free. The big companies get much money from this, but there's a way they can get even more money, in fact with those personalized ads. If you like a post with the Hashtag #mcdonalds on Instagram, Facebook, the company which owns Instagram, store the data, that you probably like McDonalds because of the post you liked. They also store how long you have watched a tweet or a post even if you just want to post something but delete it without sending. Based on that information, stored in their huge data servers, they show a personalized ad of McDonalds just for you, because they think you might like it. That's how the most social media platforms work. The most famous companies are Facebook, Instagram, Twitter and Reddit. Google is a bit different, but basically the same. They don't have a platform where you can discuss about things, but they collect data, what you are searching on their searching engine, what you watch on YouTube and how long, where you are and were, how old you are, what you are interested in and much more.

They use everything of those data to find the perfect ad just for you and nobody else. Another thing is when you press "Log in with Google" on a completely other website, Google will send many data to the website, to show you ads you're interested in. Or the website just show a Google Ads Pop-up and Google won't send the data, but it's still the same ad.

Are personalized ads and data collecting always bad? No, sometimes it's helpful. If you want to buy a new pool, for example, just like a few posts on Instagram or Facebook with the Hashtag #pool and search "cheap pools" on Google. Wait until the next day and you'll see some ads about cheap pools.

Also, in Europe there's the DSGVO (Datenschutzgrundverordnung). It includes that companies must send you all the data, they stored from you, in 30 days and if something is wrong you have the right to change and delete it if you want.

Volcano experiments

You need:

- a glass
- a plate
- an aluminum foil
- 2 - 3 packages baking powder
- some dishwashing liquid
- vinegar
- water

How to do it:

Put the plate and the glass on a desk. Wrap around the aluminum foil so everything is solid. Cut a hole on the top of the class like a vulcanic crater. How to activate the volcano: Give the baking powder in the volcano. Mix water and vinegar in a second glass and if you want a cool effect put some food colour in the glass. Now put some dishwashing liquid in the glass. Finally water the mixture into the volcano and it should start exploding!

Stefan Brennsteiner

Stefan was born on 3. Oktober 1991 in Zell am See in Austria. He lives in Niedernsill and is 184 cm tall. He weighs about 85kg.. He is a professional ski athlete and a member of the "A-Kader" of the Austrian Ski Association since 2017. The young man starts for his home club USK Niedernsill.

His world cup debut was 2012 in the giant slalom in Sölden. He needed a lot of time to get his first podium place. He achieved the third place Bansko at the end of February. He had many setbacks in the time between his debut and his first podium. He had four serious knee injuries and after that tough and hard comebacks.

Stefan drives Fischer skis and boots, his ski poles are from the company Leki. Bründl Sports has always been his sponsor. The athlete trains a lot on the Kitzsteinhorn in Kaprun.

His hobbies are volleyball and soccer and he loves the beautiful nature and the mountains. Stefans father is Günther Brennsteiner he is the mayor of Niedernsill. Katharina Brennsteiner is his mother, she wrote a book about healthy cooking. Denise is the girlfriend of Stefan and sometimes she travels with him to the trainings and races.

Stephen Curry

Stephen Curry is a professional basketball player. He is 33 years old. Stephen is 191 cm tall and weighs 84 kg. He plays for the Golden State Warriors as a point guard. He has the number 30. He is one of the best players that has ever played and he is also one of the best 3-Point-Shooter.

In 2016 he broke a world record. He scored 402 3-points in one Nba-Season. With his team he won 3 times the Nba. He played 6 times in the *All-Star game and he was 2 times the Most Valuable Player (MVP) in the NBA. His father inspired him to play basketball because he also played in the NBA. His Profi-career started at the Davidson College. He played there for 3 years. Then he decided to go to the NBA-Draft. In 2009 he was the 7th pick of the Golden State Warriors. In his first NBA season he was on the second place for the *Rookie of the year. There he made friends with Clay Thompson. They are one of the best duos in the Liga. They are called "The Splash Brothers". In the season 2012/13 they scored together 483 3-Point-Shots. In 2014 he played for the first time as a starter at the All-Star game. In 2015 he got more votes than Le Bron James so he was Captain of one team at the All-Star game.

Facts about your body!

Our body is a true superhero. We use its powers every day. You might think you know nearly everything about your body, but maybe you can still learn something from this article!

- 1) Women's hearts are proven to beat faster!
- 2) Hiccups can last for a very long time. The record is held by Charles Osborne. His hiccups lasted 68 years without stopping!
- 3) 90% of people can't remember their dreams from last night!
- 4) Every 3-4 seconds, around 50,000 cells die and are replaced with new ones!
- 5) Children grow faster in spring.
- 6) An average person says 5,000 words a day!
- 7) Most people have heart attacks on Mondays.
- 8) In the mornings you are about 8mm taller than in the evening.
- 9) While you fly on an airplane your hair grows twice faster!
- 10) It's not possible to sneeze with your eyes open.
- 11) You lose more calories while you are asleep than watching TV!
- 12) In your mouth are only more bacteria, than people on earth.
- 13) The human brain needs the same amount of energy as a 10-Watt light bulb!

The new hospital

The renovation of the hospital in Mittersill has been wanted for a long time. Work on the new hospital started at the beginning of 2020.

The new hospital again offers more methods for examining many patients. Births and more difficult surgeries can be done again. Also the hospital is to be modernized inside and outside. It should have more hospital beds and more patients should have got a place.

Even a garden is planned where patients can go for a walk. There should also be a landing pad for helicopters.

The hospital in Mittersill has existed since 1908. In 1960 it was rebuilt for the first time and in 1968 it was modernized.

One reason for the construction work is that they don't have so many surgery rooms and the large flood in 2005 damaged the building.

This bad natural disaster made destroyed the rooms so much that the hospital was no longer able to do surgeries that were more difficult.

Among other things, there should be more parking spaces and a new rescue route.

The hospital is about to be ready around 2024. The new hospital is a good investment for the residents of Mittersill

Stadtfest Mittersill

The Mittersiller Stadtfest is an annual event that goes on for three days at the end of July. You do not have to pay for the entry because it is right in the centre of the city. The feast goes from Friday to Saturday (for this year it would be from 23. – 25. July). One of the first things you'll perhaps see are many simple stands with alcoholic and non-alcoholic drinks and traditional food. The beer is tapped on Friday before the band Panther Session starts to play.

A city festival mile for young and old will bring a lot of competitive atmosphere and a lot of fun on Saturday afternoon from 3 pm. There is going to be a car show, crate climbing*, target deletion* - it goes in quick succession to the parade of pedal tractors and the raffle for the big summer competition. For the kids are attractions like the tower, crazy wave a big must! You can find these and more in the small theme park. The spectacle is framed by the East Tyrolean band "Sax Royal" and the "Alpenkrachern". In the evening there is clubbing from 7 pm for electro music fans. Those who prefer to dance to Austro – Pop and oldies should stop by the Schiffbruchbar in Lebzeltergasse.

Finally on Sunday is all about tradition. The festival concert of the Tauernblas Orchestra Mittersill and the Mittersill Citizen Music* begins at 11 am. From 2 pm the "Maishofner TanzelmuSi" ensures* a wonderfully relaxed atmosphere. The twilight pint at the Heitzmann Steakhouse starts at 5 pm and is accompanied by music from the "Imbachers".

Get ready for summer!

These are a few ideas for your workout. You can combine them and do them as long as you want!

Jackknife

Lie on your back, stretch your arms and legs towards the ceiling. Slowly come up with your upper body until your arms are parallel to your legs. Hold for three seconds, then return to the floor slowly and in a controlled manner. Ten reps will make your stomach hard as steel.

Sit-ups

Lie on your back and stretch your legs straight up. Put your hands behind your neck and slowly pull your upper body towards your knees. Important: Do not tear at the neck. The strength has to come from the stomach. Hold briefly and slowly lower it back down. Ten repetitions.

Knee crunch

Get into the normal push-up position. Pull the left knee towards the upper body, past the outside of the upper arm. Extend your leg again, but do not put it down. Pull the same leg towards the upper body again, but this time towards the inside of the upper arm. 15 repetitions, then switch legs. Good for a firm stomach and tight upper arms.

Bike Austria

Bike Austria was founded by a man called Tracy Anderson and he comes from the USA.

About Tracy he is a mountainbike profi. He won a few prizes in America.

Where is Bike Austria?

Bike Austria is in Mittersill in Stampferau 50.

The shop isn't very big, but very cool!

And you get everything! Most of the time Tracy is in the bike shop and one employer works in the warehouse.

You can buy there bikes, helmets, bike clothes and much more equipment you need for biking.

Bike Austria is not open on Wednesday, because there is the kids guiding.

Guiding at Bike Austria

In the summer Bike Austria gives a possibility of guiding. It costs around 180 € for a term. Tracy and sometimes an other adult rides with the kids. A few times a year they drive to the bike park in Leogang.

It is fantastic that there are such great possibilities for the kids. Biking is such a cool sport.

If you have leisure time at home, then go out, jump on the bike, ride up the hill and then ride down the trail and have a lot of fun on the bike!

Well, cycling is superficially fun. And what is the benefit of this outdoor sport activity? You can do it in the fresh air and there are less heart diseases and diabetes under bikers. Studies have also shown that it is a true fountain of youth and can prevent disease like alzheimer.

Cycling combines four elements:

1. Easy to learn
2. Lifelong exercise possible
3. Primarily takes place in nature
4. Helps to get your cardiovascular system fit

Pumptrack

The Pumtrack was the first project of Bike Austria. Tracy said if he had not built that pumptrack not so many kids would have started biking.

Pumptrackdriving is a good training for yourself. It is not that hard and you can improve yourself everytime. Our pumptrack is on a small place in Mittersill next to the football place.

This pumptrack is with tar (Asfalt). Other pumtracks in other cities are made of dirt. That with the tar is so good because than you can even ride by a scooter, a skateboard or by rollerblades. It is a wonderful innovation for the kids.

The new project

Now Tracy has a new project. A official hometrail. He thinks it is fantastic to riide down the hills in the hiking trails, but when we have an officel hometrail then we also have high jumps and many more exciting stations. Tracy hopes that many voluntarees help him to turn his project into reality.

Bikebrand of Bike Austria

Bike Austria mostly has the brand Mondraker, but when they get another brand then they also will sell it.

Fun for a good cause

When you want to have fun and do it all for a good cause. Then we have something good for you. On Friday afternoon at 1 pm there will be a cool and fun football event at the Mittersill football place. Anyone who wants to can take part. It does not matter how old you are.

All visitors are in different age groups:

- 0 - 4 years
- 5 - 8 years
- 9 - 13 years
- 14 - 17 years
- 18 - 25 years
- 26 - 35 years
- 36 - 45 years
- 46 and older

There will be free food and drinks for all visitors and organizer.

Women and men play together. The teams will be selected random . Every football match takes 30 minutes.

For every scored goal €10 will be donated to poor people in Burundi.

End will be at 8 o'clock pm.

We are happy about many visitors.

Interesting pet facts you probably didn't know

In Austria, around 40 % of the people have pets. You probably know a lot about cats or dogs, so here are 5 popular animals with 5 interesting facts each, which you probably didn't know...

1. Dogs

- More than 340 different dog breeds exist in the world.
 - Dogs have three eyelids.
 - They can't see the colour red.
- Dogs can smell up to 10 000 times better than we do.
- They also sweat with the sweat glands in their paws.

2. Cats

- Most cats are lactose intolerant (it's harmful for them to drink milk)
- Some cats had survived from 35 floor falling due to their righting reflex.
 - They have more bones than humans.
 - They actually can't taste anything sweet.
 - They sleep 70 % time of their lives.

3. Fish

- The oldest known age for a fish was an Australian lungfish with 65 years.
- Fish are cold-blooded animals. They cannot regulate their body temperature, that means the body temperature depends on the weather outside.
- Fish are known to have calming effect on anyone who watches them glide serenely through the water.
 - Fish sleep with open eyes.
 - Fish are sociable and communicative.

*Schildkrötenpanzer

Interesting facts about animals you didn't know

4. Turtle

- There are 270 different types of turtles.
- They don't have ears but they can hear with thin laps of skin which cover internal ear bones
- Most of the turtle shells* are made up of 60 different bones that are all fused together.
- Turtles belong to the one of the oldest reptile groups in the world.
- The animals live about twice as long as humans.

5. Rabbit

- Rabbits start breeding at an early age when they are three to four months old.
- There are currently 45 known breeds of rabbits.
- The teeth of a rabbit never stop growing.
- Bunny ears can turn incredible 180 degrees.
- Like humans, rabbits can taste sweet, sour, salty and bitter.

How to save our environment

With so much being said about climate change and how it's affecting our planet, it can be hard to understand how one person can make a difference. But the reality is that it's much easier than you may think to start doing eco-friendly things.

1) **Recycle:**

Recycling is such a simple thing to do, but so many people don't do it. You just have to separate plastic from glass, paper or other things.

2) **Shorten your shower:**

While showering certainly saves more water than taking a bath, you can still make an impact here. Please be a bit more mindful about how much time you are spending the shower. Cutting down your shower time by 2 minutes can save much water. This will also save on the energy needed to heat the water. Another good technique is to simply turn off the shower while you are shaving or lathering your shampoo.

3) **Buy a water bottle:**

Only 10% of plastic bottles you buy end up getting recycled. If you buy a water bottle and always fill it with water by yourself, it's good for the environment.

4) **Recycle old phones:**

Most of the components contained within cell phones are not biodegradable. This means that if you throw away your old cell phone, it will just be added to the landfill.

5) **Take a fabric bag with you:**

When you go shopping, you could take a fabric bag instead of a plastic bag. You can use them more often and they are also better for our earth.

6) **Reduce food waste:**

Being more mindful about how much you purchase at the grocery store can cut down on a lot of waste. And at home, think about what you can freeze or how leftovers can be transformed into other dishes.

News around the world

Fight between Vienna and Ankara

"I curse the Austrian state. It probably wants the Muslims to pay the price for subjecting the Jews to genocide." That is what Turkish President Recep Tayyip Erdogan said. He went on claiming, "Anyone who raises the flag of a terrorist state supports terror." It was about raising the Israeli flag on the roof of the Federal Chancellery as a sign of solidarity in the Middle East conflict. Since Austria raised the flag and decided to support the terrorists from the middle east conflict it has been very critical with the support of the Austrians.

Long story short

The Turkish president Recep Tayyip Erdogan cursed Austria because they raised flags of Israel. He thinks that they want that the Muslims get back what they did to Jews. But the Austrians did that because they want to stop the terrorism in the world.

Survey Covid-19 of some students

We decided to make a Covid-19 Survey at our school because that's a topic which affects everybody. We are happy that 57 students helped us with that.

Here are the results:

Yes No

Little Johnny asked his father,
 "Dad, can you write in the dark?" His father said, "I think so, what do you want me to write?" Little Johnny replied, "Oh, just sign this report card for me..."

Question: Why are blonde women jokes so short? Answer: So men can remember them.

Fat patient: Doctor, I want to lose weight fast.

Doctor: It is very easy, just keep shaking your head, left and right.

Fat patient: All the time?

Doctor: No, only when someone offers you food.

A man receives a phone call from his doctor.

The doctor says, "I have one good and one bad news."

The man says, "OK, give me the good news first."

The doctor says, "The good news are, you have 24 hours to live."

The man replies, "Oh no! If that's the good news, then what's the bad news?"

The doctor says, "The bad news is, I forgot to call you yesterday."

Question: Why did the blonde get excited after finishing a puzzle in 5 months?

Answer: The box said 3 - 5 years!

Get to know us!

Hi! I am Zoe Brennsteiner, I am fourteen years old and I am the editor of school elements. I am responsible for historical and medical items and I corrected most of the articles. When I grow up, I want to become a pediatric surgeon because I want to help people and children in particular. My dream is to cure cancer. Keep the smile on and stay healthy!

My name is Angelina and I am the editor of the magazine "school elements". I wrote the articles "save the environment" and "facts you probably didn't know about pets". I love animals and that's why I chose this topic. In my opinion, we should start to do something good for the environment because otherwise we will have a big problem in the future.

But in our magazine you can also read about many other interesting and important topics.

Hello I am Lucas Eberharter. I think I am always friendly when I meet other persons. And if somebody needs my help, then I will help him. I love biking and I also love to go scooter driving. It is so cool driving down the hills by bike.

OUR TEAM

Hi my name is Antonio Govorusic. I am 14 years old. My hobbies are football and basketball. I also like to play playstation with my friends.

My name is Lena and I am 14 years old. In the magazine I wrote about the Stadtfest in Mittersill and about the fight between Vienna and Ankara. I am really interested in political themes. In my freetime I mostly go outside with friends where we do different things.

Hi, my name is Arian and I'm 14 years old and I like to play tennis in my free time. I am the mind behind the two articles in our magazine "school elements". At first I wrote about physical magnetisms and as second topic I chose the e-mobility in Europe.

OUR TEAM

Hi, my name is Magdalena. I help you with your problems. If you have some you can just contact me, I'll try to solve them. I like swimming, reading, drawing and playing the violine. I am 14 years old, and I visit the 4th class of the MS-Mittersill. My dream is to become an architect one day.

Hello, I'm Laurens. I'm responsible for the social media and experimental part. My hobbies are playing tennis and biking. I also like cooking and baking cakes. In my opinion I am a very motivated person when I'm interested in the topic.

Hello my name is Tim and I'm 14 years old. My hobbies are skiing and running. In our magazine "school elements" I wrote three articles. I wrote about the new hospital, a football event and about politics in Austria.

OUR TEAM

Hey, I am Sebastian Fankhauser, I am 14 years old and from Stuhlfelden. In this newspaper I write about winter sports and fitness in summer. In my free time I like to go skiing and trail riding. I often meet friends and help them when they need me.

We hope you´ll enjoy our magazine!
